## Internet Safety

### The Internet Safety Mission

It was library time. Malik and Zoe went to their computers. On each desk was a sign that said: Internet Safety Mission Today!

"What's our mission?" Zoe asked.

Ms. Lopez said, "Today, your mission is to stay safe while using the internet."

"What are we learning?" Malik asked.

"We're going to talk about what's okay to share online—and what should stay private," Ms. Lopez said. "Let's start with a question: If someone online asks where you live, should you tell them?"

Zoe shook her head. "No."

"Exactly," Ms. Lopez said. "That's private information. Private information includes your last name, your address, your phone number, your school, and your passwords."

Malik raised his hand. "What's okay to share?"

"Good question!" said Ms. Lopez. "You can share your first name and your favorite color or hobby—but only if a trusted adult says it's okay."

"What else should we know?" asked Zoe.

Ms. Lopez held up a poster with 4 safety rules:

1. Don't talk to strangers online.
2. Never share private info like your full name or address.
3. Use only your first name.
4. Watch out for scams—if it looks too good to be true, it probably is!

## Digital Communication Tools

We use many tools to communicate online:

- Email programs
- Educational websites with messaging
- Video call applications
- School learning platforms
- Online games with chat features

Each tool needs the same safety rules.

## Private Information (Never Share)

Keep these secret online:

- Your last name
- Home address
- Phone number
- School name
- Passwords
- Birthday
- Parent's names

- Photos without permission

## Safe Information (Only with Permission)

You might share:

- Your first name only
- Favorite subjects
- Hobbies you enjoy
- General interests

Always ask a trusted adult first.

## Safe vs. Unsafe Communications

Safe communications:

- Messages on school-approved sites
- Emails to family members
- Teacher-supervised chats
- Educational website activities

Unsafe communications:

- Messages from strangers
- Requests for personal information
- "You won a prize" pop-ups
- Friend requests from unknown people

## The 4 Internet Safety Rules

1. **Don't talk to strangers** – Just like in real life
2. **Keep info private** – No addresses, no last names
3. **Use only first name** – When allowed online
4. **Watch for tricks** – Scams try to fool you

## Digital Consent

Before posting anything:

- Get permission to share photos of others
- Ask before sharing someone's work

- Check with adults about what to post
- Respect others' privacy online

## Warning Signs of Unsafe Situations

Tell an adult if:

- Someone asks personal questions
- You receive strange messages
- A site asks for private information
- Someone wants to meet in person
- You see inappropriate content

## Making Safe Choices Online

Good practices:

- Only visit teacher-approved websites
- Never click unknown links
- Keep passwords secret
- Log out when finished
- Ask adults when unsure

## Internet Safety Scenarios

What would you do?

Scenario 1: A game asks for your full name and address.

Answer: Don't enter it. Tell an adult.

Scenario 2: Someone online says they go to your school and wants to be friends.

Answer: Don't respond. Show a trusted adult.

Scenario 3: You get a message saying you won a prize.

Answer: It's probably a scam. Don't click it.

## Critical Thinking Questions

1. Why is some information safe to share and other information private?
2. What should you do if someone online asks where you go to school?
3. How can you use the internet for learning while staying safe?

## Sentence Stems

- "Private information includes (blank space) because (blank space)."

- "Before sharing online, I (blank space)."
- "Safe internet use means (blank space)."

## Questions (5)

### 1. What is private information?

MULTIPLE CHOICE

Choose the correct answer:

- A. Your favorite food
- B. Your pet's name
