Health Information Technician

Does both computers and the medical field interest you? Are you someone who is honest? If so, maybe you should look into becoming a health information technician!

What does a health information technician do?

Health information technicians handle all of the records and information that come from doctors and patients. These technicians are also sometimes known as medical record technicians because of their responsibilities. These technicians' jobs are to keep the records and information of patients private through using special softwares.

What is a typical day like?

The majority of health information technicians work in hospitals or physician offices. They work full-time and most often do so at a computer. If working at a hospital, it is possible that one could work in the evening or overnight.

When on the job, health information technicians gather data and information about patients from different health care workers to make sure the lab results, test results, and medical history is accurate and kept private. They then take this information and put it in a database in order to protect and retrieve the data later if needed.

What kind of training or schooling is required?

There are many ways to become a health information technician. You can get a bachelor's degree in information systems, health care administration, or business. You can also enter this job with an associate degree. If this is your goal, consider working in a customer service role while getting your education to gain helpful experience for this position.

Job and Salary Outlook

Due to the U.S. population aging and needing more medical services, the health information technician field is expected to grow. More specifically, it is predicted that the number of positions in this area will increase by 9% between 2020 and 2030.

According to the U.S. Bureau of Labor Statistics, the median salary for health information technicians in May of 2020 was \$51,840. That's the same as making \$21.75 per hour. However, what one is paid is dependent on where they live and their level of experience. The salary for this position can range between \$29,130 and \$105,690 depending on the factors mentioned above.
